

# JAZZ AT LINCOLN CENTER'S ESSENTIALLY ELLINGTON LIBRARY

WYNTON MARSALIS, MANAGING AND ARTISTIC DIRECTOR, JAZZ AT LINCOLN CENTER

## RENT PARTY BLUES

Composed by Duke Ellington and Johnny Hodges

Arranged by Duke Ellington

Transcribed by Christopher Crenshaw

As performed by Duke Ellington & His Orchestra

### FULL SCORE

This transcription was made especially for Jazz at Lincoln Center's  
*2023-24 Essentially Ellington High School Jazz Band Program.*

Jazz at Lincoln Center and [ejazzlines.com](http://ejazzlines.com) gratefully acknowledge the cooperation and support provided in the publication of this year's Essentially Ellington music series:  
A very special thanks to Jody and John Arnhold for their extraordinary support of Jazz at Lincoln Center, including its education initiatives.

Founding leadership support for Essentially Ellington is provided by the Jack and Susan Rudin Educational and Scholarship Fund and Gail and Alfred Engelberg.

Major support is provided by the Hearst Foundations, Helen Appel, the Ella Fitzgerald Charitable Foundation, Jacqueline L. Bradley and Clarence Otis, Augustine Foundation, the Charles Evan Hughes Memorial Fund, and the Weissman Family Foundation, Inc.

Generous support is provided by the Fiona and Eric Rudin Charitable Fund, Dr. J. Douglas White and the King-White Family Foundation, Lisa Roumell and Mark Rosenthal, Michelle Deal Winfield, the Susan Rudin Charitable Fund, and the Keith and Rose-Lee Reinhardt Family Foundation.

JAZZ AT LINCOLN CENTER

## NOTES ON PLAYING ELLINGTON

At least 95% of modern-day large ensemble jazz playing comes out of three traditions: Count Basie's band, Duke Ellington's band, and the orchestrations of small groups. Those young players interested in jazz will be drawn to small groups for the opportunity to improvise and for practical reasons (it is much easier to organize 4 or 5 people than it is 15). Schools have taken over the task (formerly performed by dance bands) of training musicians to be ensemble players. Due to the Basie Band's popularity and its simplicity of style and emphasis on blues and swing, the better educators have almost exclusively adopted this tradition for teaching jazz ensemble playing. As wonderful as Count Basie's style is, it doesn't address many of the important styles developed under the great musical umbrella we call jazz. Duke Ellington's comprehensive and eclectic approach to music offers an alternative.

The stylistic richness of Ellington's music presents a great challenge to educators and performers alike. In Basie's music, the conventions are very nearly consistent. In Ellington's music there are many more exceptions to the rules. This calls for greater knowledge of the language of jazz. Clark Terry, who left Count Basie's band to join Duke Ellington, said, "Count Basie was college, but Duke Ellington was graduate school." Knowledge of Ellington's music prepares you to play any big band music.

The following is a list of performance conventions for the great majority of Ellington's music. Any deviations or additions will be spelled out in the individual performance notes which follow.

1. Listen carefully many times to the Ellington recording of these pieces. There are many subtleties that will elude even the most sophisticated listener at first. Although it was never Ellington's wish to have his recordings imitated, knowledge of these definitive versions will lead musicians to make more educated choices when creating new performances. Ellington's music, though written for specific individuals, is designed to inspire all musicians to express themselves. In addition, you will hear slight note differences in the recording and the transcriptions. This is intentional, as there are mistakes and alterations from the original intent of the music in the recording. You should have your players play what's in the score.
2. General use of swing phrasing. The triplet feel prevails except for ballads or where notations such as even eighths or Latin appear. In these cases, eighth notes are given equal value.
3. There is a chain of command in ensemble playing. The lead players in each section determine the phrasing and volume for their own section, and their section-mates must conform to the lead. When the saxes and / or trombones play with the trumpets, the lead trumpet is the boss. The lead alto and trombone must listen to the first trumpet and follow them. In turn, the other saxes and trombones must follow their lead players. When the clarinet leads

the brass section, the brass should not overblow them. That means that the first trumpet is actually playing "second." If this is done effectively, there will be very little balancing work left for the conductor.

4. In Ellington's music, each player should express the individuality of their own line. They must find a musical balance of supporting and following the section leader and bringing out the character of the underpart. Each player should be encouraged to express their personality through the music. In this music, the underparts are played at the same volume and with the same conviction as the lead.
5. Blues inflection should permeate all parts at all times, not just when these opportunities occur in the lead.
6. Vibrato is used quite a bit to warm up the sound. Saxes (who most frequently represent the sensual side of things) usually employ vibrato on harmonized passages and no vibrato on unisons. The vibrato can be either heavy or light depending on the context. Occasionally saxes use a light vibrato on unisons. Trumpets (who very often are used for heat and power) use a little vibrato on harmonized passages and no vibrato on unisons. Trombones (who are usually noble) do not use slide vibrato. A little lip vibrato is good on harmonized passages at times. Try to match the speed of vibrato. In general unisons are played with no vibrato.
7. Crescendo as you ascend and diminuendo as you descend. The upper notes of phrases receive a natural accent and the lower notes are ghosted. Alto and tenor saxophones need to use sub-tone in the lower part of their range in order to blend properly with the rest of the section. This music was originally written with no dynamics. It pretty much follows the natural tendencies of the instruments; play loud in the loud part of the instrument and soft in the soft part of the instrument. For instance, a high C for a trumpet will be loud and a low C will be soft.
8. Quarter notes are generally played short unless otherwise notated. Long marks above or below a pitch indicate full value: not just long, but full value. Eighth notes are played full value except when followed by a rest or otherwise notated. All notes longer than a quarter note are played full value, which means if it is followed by a rest, release the note where the rest appears. For example, a half note occurring on beat one of a measure would be released on beat three.
9. Unless they are part of a legato background figure, long notes should be played somewhat **fp** (forte-piano); accent then diminish the volume. This is important so that the moving parts can be heard over the sustained notes. Don't just hold out the long notes, but give them life and personality: that is, vibrato, inflection, crescendo, or diminuendo. There is a great deal of inflection in this music, and much of this is highly interpretive. Straight or curved lines imply non-pitched glisses, and wavy lines mean scalar

(chromatic or diatonic) glisses. In general, all rhythmic figures need to be accented. Accents give the music life and swing. This is very important.

10. Ellington's music is about individuality: one person per part—do not double up because you have extra players or need more strength. More than one on a part makes it sound more like a concert band and less like a jazz band.
11. This is acoustic music. Keep amplification to an absolute minimum; in the best halls, almost no amplification should be necessary. Everyone needs to develop a big sound. It is the conductor's job to balance the band. When a guitar is used, it should be a hollow-body, unamplified rhythm guitar. Simple three-note voicings should be used throughout. An acoustic string bass is a must. In mediocre or poorly designed halls, the bass and piano may need a bit of a boost. I recommend miking them and putting them through the house sound system. This should provide a much better tone than an amplifier. Keep in mind that the rhythm section's primary function is to accompany. The bass should not be as loud as a trumpet. That is unnatural and leads to over-amplification, bad tone, and limited dynamics. Stay away from monitors. They provide a false sense of balance.
12. We have included chord changes on all rhythm section parts so that students can better understand the overall form of each composition. It is incumbent upon the director to make clear what is a composed part versus a part to be improvised. The recordings should make this clear but in instances where it is not; use your best judgment and play something that sounds good, is swinging, and is stylistically appropriate to the piece. Sometimes, a student may not have the technical skill to perform a difficult transcription, especially in the case of one of Duke's solos, in that case, it is best to have the student work something out that is appropriate. Written passages should be studied and learned, when possible, as they are an important part of our jazz heritage and help the player understand the function of their particular solo or accompaniment. All soloists should learn the chord changes. Solos should be looked at as an opportunity to further develop the interesting thematic material that Ellington has provided.
13. The notation of plungers for the brass means a rubber toilet plunger bought in a hardware store. Kirkhill is a very good brand (especially if you can find one of their old hard rubber ones, like the one I loaned Wynton and he lost). Trumpets use 5" diameter and trombones use 6" diameter. Where Plunger/Mute is notated, insert a pixie mute in the bell and use the plunger over the mute. Pixies are available from Humes & Berg in Chicago. "Tricky Sam" Nanton and his successors in the Ellington plunger trombone chair did not use pixies. Rather, each of them employed a Nonpareil (that's the brand name) trumpet straight mute. Nonpareil has gone out of business, but the Tom Crown Nonpareil trumpet straight mute is very close to the same thing. These mute/plunger combinations create a wonderful sound (very close to the human

voice), but they also can create some intonation problems which must be corrected by the lip or by using alternate slide positions. It would be easier to move the tuning slide, but part of the sound is in the struggle to correct the pitch. If this proves too much, stick with the pixie—it's pretty close.

14. The drummer is the de facto leader of the band. The drummer establishes the beat and controls the volume of the ensemble. For big band playing, the drummer needs to use a larger bass drum than he would for small group drumming. A 22" or 24" is preferred. The bass drum is played softly (nearly inaudible) on each beat. This is called feathering the bass drum. It provides a very important bottom to the band. The bass drum sound is not a boom and not a thud—it's in between. The larger size drum is necessary for the kicks; a smaller drum just won't be heard. The key to this style is to just keep time. A rim knock on two and four (chopping wood) is used to lock in the swing. When it comes to playing fills, the fewer, the better.
15. The horn players should stand for their solos and solis. Brass players should come down front for moderate to long solos, surrounding rests permitting. The same applies to the pep section (two trumpets and one trombone in plunger/mutes).
16. Horns should pay close attention to attacks and releases. Everyone should hit together and release together.
17. Above all, everyone's focus should remain at all times on the swing. As the great bassist Chuck Israels says, "The three most important things in jazz are rhythm, rhythm, and rhythm, in that order." Or as Bubber Miley (Ellington's first star trumpeter) said, "It don't mean a thing if it ain't got that swing."

## GLOSSARY

The following are terms which describe conventions of jazz performance, from traditional New Orleans to the present avant-garde.

**Break** • within the context of an ongoing time feel, the rhythm section stops for one, two, or four bars. Very often a soloist will improvise during a break.

**Call and response** • repetitive pattern of contrasting exchanges (derived from the church procedure of the minister making a statement and the congregation answering with "amen"). Call-and-response patterns usually pit one group of instruments against another. Sometimes we call this "trading fours," "trading twos," etc., especially when it involves improvisation. The numbers denote the amount of measures each soloist or group plays. Another term frequently used is "swapping fours."

**Coda** • also known as the "outro." "Tags" or "tag endings" are outgrowths of vaudeville bows that are frequently used as codas. They most often use deceptive cadences that finally resolve to the tonic or they go from the sub-dominant and cycle back to the tonic.

**Comp** • improvise accompaniment (for piano or guitar).

**Groove** • the composite rhythm. This generally refers to the combined repetitive rhythmic patterns of the drums, bass, piano, and guitar, but may also include repetitive patterns in the horns. Some grooves are standard (i.e., swing, bossa nova, samba), while others are manufactured (original combinations of rhythms).

**Head** • melody chorus.

**Interlude** • a different form (of relatively short length) sandwiched between two chorus forms. Interludes that set up a key change are simply called modulations.

**Intro** • short for introduction.

**Ride pattern** • the most common repetitive figure played by the drummer's right hand on the ride cymbal or hi-hat.

**Riff** • a repeated melodic figure. Very often, riffs repeat verbatim or with slight alterations while the harmonies change underneath them.

**Shout chorus** • also known as the "out chorus," the "sock chorus," or sometimes shortened to just "the shout." It is the final ensemble passage of most big band charts and where the climax most often happens.

**Soli** • a harmonized passage for two or more instruments playing the same rhythm. It is customary for horn players to stand up or even move in front of the band when playing these passages. This is done

so that the audience can hear them better and to provide the audience with some visual interest. A soli sound particular to Ellington's music combines two trumpets and trombone in plungers/mutes in triadic harmony. This is called the "pep section."

**Stop time** • a regular pattern of short breaks (usually filled in by a soloist).

**Swing** • the perfect confluence of rhythmic tension and relaxation in music creating a feeling euphoria and characterized by accented weak beats (a democratization of the beat) and eighth notes that are played as the first and third eighth notes of an eighth-note triplet. Duke Ellington's definition of swing: when the music feels like it is getting faster, but it isn't.

**Vamp** • a repeated two- or four-bar chord progression. Very often, there may be a riff or riffs played on the vamp.

**Voicing** • the specific spacing, inversion, and choice of notes that make up a chord. For instance, two voicings for G7 could be:

Note that the first voicing includes a 9th and the second voicing includes a 9th and a 13th. The addition of 9ths, 11ths, 13ths, and alterations are up to the discretion of the pianist and soloist.

## THE FOUR ELEMENTS OF MUSIC

The following are placed in their order of importance in jazz. We should never lose perspective on this order of priority.

**Rhythm** • meter, tempo, groove, and form, including both melodic rhythm and harmonic rhythm (the speed and regularity of the chord changes).

**Melody** • a tune or series of pitches.

**Harmony** • chords and voicings.

**Orchestration** • instrumentation and tone colors.

## RENT PARTY BLUES

### INSTRUMENTATION

Reed 1 – Soprano Sax/Alto Sax

Reed 2 – Alto Sax

Reed 3 – Tenor Sax

Trumpet 1

Trumpet 2

Trumpet 3

Trombone

Banjo

Piano

Bass

Drums

### ORIGINAL RECORDING INFORMATION

**Composer** • Duke Ellington and Johnny Hodges

**Arranger** • Duke Ellington

**Recorded** • March 1, 1929 in New York City

**Original issue** • Brunswick 4345

**Currently available as digital download** • Amazon, iTunes (Duke Ellington, *The Duke: The Columbia Years (1927-1962)*)

**Personnel** • Freddy Jenkins, Arthur Whetsel, Cootie Williams (trumpets); Joe "Tricky Sam" Nanton (trombone); Johnny Hodges (soprano sax, alto sax); Harry Carney (alto sax); Barney Bigard (tenor sax); Fred Guy (banjo); Duke Ellington (piano); Wellman Braud (bass); Sonny Greer (drums)

**Soloists** • Johnny Hodges (soprano sax), Arthur Whetel (trumpet), Joe "Tricky Sam" Nanton (trombone)

### REHEARSAL NOTES

- The percussionist can make or break this tune. The part doesn't look like much, but Sonny Greer improvised on account of not having a part. He orchestrated this very well with only a cymbal. I wish I knew what he used to strike the cymbal, but I believe a yarn mallet will give you the closest sound.
- Play the long notes with feeling and direction in the intro. The rhythm section needs to play their quarter notes stingily so the brass can know how to play their figures at letter **A** behind the solo soprano sax.
- Johnny Hodges is coming out of his idol, Sidney Bechet. Hodges's sister, Claretta, was already acquainted with Bechet and introduced Johnny to him. From that point on, Bechet gave Hodges lessons on soprano saxophone, and one can certainly hear Bechet's influence on Hodges.
- A common thread is the 'big three' in the bridge (ex. bar before **C**). The rhythm section and accompanying horns need to make a character out of the half note.
- Be mindful that the solo trumpet at letters **E-F** is in a cup mute. The saxes and rhythm need to be softer here. The progression is different as well.
- The solo at letter **G** is a rare open horn solo for Joe "Tricky Sam" Nanton. He refers to the melody, but peep the sincerity in his sound. You get a glimpse of him growling in the big threes at the bridge; other than that, the sound is big and confident.
- All solos, solis, and tuttis should adopt the rhythm section's shuffle pattern. It's based on ragtime, which uses straighter eighth notes with a bit of a lilt. Listen to the saxes at letter **K**.
- The trombone is the lowest part of 3-part harmony at letter **M**. Use a player that can hit an 8th-partial Bb above middle C comfortably. Brass, keep the hot parts hot and the sweet parts (legato 3rd bar of letters **M**, **N**, and **P**) sweet.
- The soprano sax solo at letter **O** can be improvised; it's encouraged.
- Follow the soprano sax three before the end.

— Christopher Crenshaw

*Detailed description of the musical score: This is a page of a musical score for a jazz ensemble. It features ten staves: Soprano Saxophone (S. Sx.), Alto Saxophone (Alto), Tenor Saxophone (Tenor), Trumpets 1 (Tpts. 1), Trumpets 2 (Tpts. 2), Trumpets 3 (Tpts. 3), Trombone (Tbn.), Banjo (Bjo.), Piano (Pno.), Bass (Bs.), and Drums (Drs.). The key signature is B-flat major (two flats). The time signature is 4/4. The score is marked with a box 'A' at the beginning. The Soprano Saxophone part has a melodic line with some grace notes. The Alto and Tenor parts are mostly rests. The Trumpets 1, 2, and 3 parts have similar melodic lines, with a dynamic marking of *mf* for the second staff. The Trombone part has a more active line. The Banjo part has a rhythmic accompaniment with a dynamic marking of *mf*. The Piano part has a rhythmic accompaniment with the instruction 'stride as needed'. The Bass part has a rhythmic accompaniment with the instruction 'slap pizz.'. The Drums part has a rhythmic accompaniment with the instruction '(time on held ride/sock cymbal if no Banjo)'. The chord progression is indicated above the Banjo staff: Bb, Bb7, Eb, Ebm, Bb, F7, Bb, C7, F7. The measure numbers 5 through 12 are indicated at the bottom of the page.*

Rent Party Blues

**B**

The musical score is arranged in a standard orchestral layout. The S. Sax part features a melodic line with triplets and accents. The Tbn. part provides a rhythmic accompaniment with accents. The Bjo. part shows a sequence of chords: B<sup>b</sup>, B<sup>b</sup>7, E<sup>b</sup>, E<sup>b</sup>m, B<sup>b</sup>, F7, B<sup>b</sup>, F7, B<sup>b</sup>, and G<sup>b</sup>7. The Pno. part consists of a steady eighth-note accompaniment. The Bs. part plays a simple bass line. The Drs. part is mostly silent, with a final chord at the end of the section.
